EXAMINER'S AMENDMENT

This application contains claims directed to the following patentably distinct species: the species of figure 3(a) and the species of figure 5. The species are independent or distinct because they are not disclosed as being usable together and are therefore mutually exclusive.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

During a telephone conversation with Philip O. Post on July 12, 2007 a provisional election was made without traverse to prosecute the species of figure 3(a). Claims 9 to 14 stand withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected species.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Art Unit: 3746

The application has been amended as follows:

In claim 1, line 2, "outer open" has been changed to --open outer-- for consistency.

In claims 6 and 8, line 1, "supply" has been changed to --supplying--.

Claims 9 to 14 have been canceled as being drawn to a species non-elected without traverse.

The following is an examiner's statement of reasons for allowance:

The claims are deemed allowable because the prior art does not teach or reasonably suggest an electromagnetic pump having an open outer tube with a closed bottom, an open mid tube disposed within the outer tube to form an annular volume, an open inner tube disposed within the mid tube, a magnetic material disposed between the inner tube and the mid tube, a plurality of induction coils disposed around the outer tube, and a means for supplying an ac current to the induction coils.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry relating to patent applications in general should be directed to the Patent Assistance Center at 1-800-786-9199.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Koczo, Jr. whose telephone number is 571-272-4830.

The examiner can normally be reached on M-Th; 7:00-3:30.
